Digital Watchdog[®] Launches New POE Splitter Extender
This indispensable network accessory saves time and money by allowing installers to use an existing PoE network cable to power two PoE devices instead of one.

DW[®] DW-POEEX2 Splitter Extender.

Cerritos, CA (June 27, 2024) – [Digital Watchdog[®] \(DW\)](#), the industry leader in digital recorders, surveillance cameras, perimeter protection devices, system peripherals and related management software, announces a new PoE splitter extender. The DW-POEEX2 simplifies existing and new installations, extending power to two devices from a single network cable at up to 328 feet (100m) from the PoE switch.

DW's 2-port Gigabit waterproof PoE extender splitter splits and extends the connection between a PoE Injector or PoE switch (PSE) and the PoE edge devices (PD). The DW-POEEX2 supports one RJ45 90W port input (IEEE802.3bt) and delivers two (2) split PoE ports with 30W and 60W support at up to 328 feet (100 meters). With a robust IP67-rated, IK10 impact-resistant housing and no need for a power adapter, DW's PoE extender splitter is ideal for harsh environments where access to a network might not be available.

“With the addition of this handy accessory, installers can add a device to an existing PoE cable instead of running another cable all the way from the switch,” said Mark Espenschied, Director of Marketing, DW. “Imagine the savings in time and money of simply extending the cable used for an existing PoE camera to another camera or peripheral.”

Product Features:

- Single (1) 90W PD input, two (2) PSE split output
- PoE power supply distance up to 328 feet (100 meters)
- Plug-and-play solution with no configuration
- Data and power carried over the same cable
- No power adapter is required
- Ideal for harsh outdoor environment
- IEEE802.3af/at/bt standard compliance
- Support 10/100/1000Mbps data transmission
- IP67- and IK10-rated housing built to last
- 1 year warranty
